ABOUT THE EVENT

Under the auspices of the **Hellenic Ministries of Environment and Energy, Maritime Affairs and Insular Policy, Infrastructure and Transport** and the support of the **Regional Administration of Crete**, Cretan Energy Conferences (CEC) is honoured to organise the "5th Cretan Energy Conference & Exhibition- International Energy Exhibition in Greece that is going to take place in Heraklion, Crete. The event presents a unique platform to bring together national authorities, industry executives and experts from Greece, Mediterranean and other countries in order to share information and insights related to the energy sector. **Free entrance is offered to the audience** and therefore speakers and exhibitors will have the opportunity to communicate and share ideas, solutions and products with a wide range of attendees.

PRESENTATION TOPICS

- Topic 1 **Greece, Cyprus, Israel, Egypt Promote Energy Development Projects: What the Future Holds**
- Topic 2 **Enhance Security in Mediterranean Region: Strategies, Synergies and Collaborations**
- Topic 3 **An insight of Oil and Gas E&P Companies into discovering and producing energy resources in Mediterranean Region**
- Topic 4 **Natural Gas Projects, Hydrogen Technology & Renewables Energy Sources**
- Topic 5 **Shipping Industry: Connecting energy resources with market demand**
- Topic 6 **The key- role of Crete in the energy sector: Current Status and Future Development**
- Topic 7 **Regional growth and development together with energy resources**
- Topic 8 **Constructions, Electromobility & Environmental Projects for Sustainable Growth**

➡ More information about the topics is presented in the following section

EXHIBITION EVENT NEW

Authorities, institutes and companies can be participating in the exhibition event to present their expertise, skills and knowledge related to the energy sector. More information about booking an exhibition place can be found in "Sponsorship CEC 2021".

PRESENTATION TOPICS- DESCRIPTION

Topic 1: Greece, Cyprus, Israel, Egypt Promote Energy Development Projects: What the Future Holds

Covering topics related to national strategies promoted by authorities for energy security and regional supply, exploration activities, energy development project plans and status (gas terminals, gas and oil pipelines, power plants, renewable energy, electrical interconnections), benefits of energy projects on society and environment.

Topic 2: Enhance Security in Mediterranean Region: Strategies, Synergies and Collaborations

Covering topics related to strategies and synergies in Mediterranean region that enhance energy security for Europe, enhance regional security, strategies and policies of EU and NATO, geopolitical role of Greek EEZ, national strategies of protecting offshore activities.

Topic 3: An insight of Oil and Gas E&P Companies into discovering and producing energy resources in Mediterranean Region

Covering topics related to O&G strategies, drilling activities, management of E&P, regulatory & environmental requirements, infrastructure for drilling, production concepts, importance of gas infrastructure for decision-making (presented by major stakeholders).

Topic 4: Natural Gas Projects, Hydrogen Technology & Renewables Energy Sources

Covering topics related to technical, regulatory, environmental actions, construction and operation of wind, solar, geothermal, wave and hydro energy, latest advancements and applications in hydrogen technology, LNG regasification terminals, natural gas fired power plants, gas pipelines, other concepts of energy supply and related service sectors in energy supply.

Topic 5: Shipping Industry: Connecting energy resources with market demand

Covering topics related to carrier suppliers, LNG transportation, Floating Regasification Storage Units (FSRU), Green fuels for shipping (regulations for carriers), pipe-laying vessels drilling units, Floating Production and Storage Units (FPSO), loading and offloading systems and terminals, regulations and related services sectors.

Topic 6: The key- role of Crete in the energy sector: Current Status and Future Development

Covering topics related to Crete, such as offshore hydrocarbon resources, renewable energy, electrical transmission, interconnections, gas pipelines, potential projects related to infrastructure for energy and gas export, port infrastructure and management for energy projects and shipping industry, training, certifications, etc

Topic 7: Regional growth and development together with energy resources

Covering topics related to technical expertise for oil and gas activities, infrastructure development, impact on tourism industry, culture, protection of environment, training / education, job creations and benefits to local industries and economy.

Topic 8: Constructions, Electromobility & Environmental Projects for Sustainable Growth

Covering topics related to carbon capture, use and storage projects, power grids, decarbonisation plans, construction industry, electromobility, green transportation, smart cities, recycling, waste-water treatment.
